

Let's Reach Success: Media Kit

Let's Reach Success is a constantly growing platform covering the topics of personal and business growth. The blog aims to help millennials achieve financial independence through making money online so they can use that income to live their best life.

Founded in 2013, being the home of over 2,000 articles (unique, quality content), ranking #1 for keyword phrases, and having new content published consistently (weekly or more often) for a decade, the platform and its creator - Lidiya Kesarovska - have established themselves as one of the go-to resources in the industry and have become trustworthy in the eyes of search engines.

Featured in Yahoo News!, Yahoo Finance!, TIME Magazine, Thrive Global, Disrupt Magazine, Entrepreneur, Fundera, Foundr, and more.

Conditions

Payments

- We accept payments via PayPal (in USD).
- Payments are made in advance.
- You'll be asked to provide a company name and address for the invoice (or the name and address of an individual, in which case VAT charges will apply).

Blog Post Requirements

- provide a unique piece of content;
- include only one link to your website/product/client/etc. (unless you're ordering the Golden or Bundle Package);
- include the link naturally in the text and not right in the beginning.

Additional Details

- I reserve the right to make final edits to the articles in terms of formatting, adding images and external and internal links.
- Blog posts often get published immediately after I review them. Allow at least 24 hours for the publication to be live. In some cases, that might take a few days.
- Due to the big number of requests, I'm now choosing carefully who to work with.
- I don't work with late-paying or low-paying clients. I can't build trust with those who don't provide financial information or who are in a rush to get their article published.
- Advertising should be done right, according to Google's guidelines, and without looking spammy to readers. So please get in touch with me only if you're offering quality content with naturally inserted links.
